

**“Matt was a  
breath of fresh air  
bringing new  
ideas to us”**

**John McCabe, Caledonian Alloys**

Alloy recycling leaders Caledonian Alloys have been employing IAESTE students for several years. They were looking for an enthusiastic, hard working student to gain experience of shop floor operations and get involved in the company's research and development activities. They hosted Matthew Theisen, a chemical engineering student from the University of Minnesota in the USA. His supervisor, John McCabe said: “I would recommend IAESTE to every company. All the IAESTE trainees bring something; like a breath of fresh air with new ideas. Matt adjusted very quickly and has really got to grips with everything, got on great with everyone and understood exactly what was asked of him.”

IAESTE (The International Association for the Exchange of Students for Technical Experience) has over 60 years of experience organising degree-related, work experience placements for undergraduate students of science, engineering, architecture and related fields across over 80 different countries worldwide.

If your company is looking to develop new business opportunities overseas, IAESTE is a great way to build contacts and cultural links. We offer UK employers well qualified and highly motivated international trainees and, in exchange, we are able to provide science, engineering and architecture undergraduates in the UK with training experience abroad relevant to their studies.

Students are hand-picked through a stringent selection process according to your criteria. IAESTE UK takes care of visas, work permits and accommodation, leaving the supervisor free to get the most from having the student with them. The service that we provide, in sourcing the student and taking care of the administration, is completely free. The only cost to the company is the student's salary, which must adhere to at least minimum wage.
