

“Alex and Timur filled a real business need”

Stewart Liddell, J&D Wilkie Ltd

J&D Wilkie, a Kirriemuir based textile manufacturing company, was looking for two students to assist with the development side of the business. Mechanical engineering students Alex Cittandi from Australia and Timur Rakhmatullin from the Austria were a perfect fit. “They've been great and have worked through whatever project we threw at them. There was a real business need that they were able to fill; we would definitely do it again. Alex even attended an offshore event in Aberdeen to represent us. He has the knowledge of the products and personality to do these things.” Stewart Liddell, J&D Wilkie.

IAESTE (The International Association for the Exchange of Students for Technical Experience) has over 60 years of experience organising degree-related, work experience placements for undergraduate students of science, engineering, architecture and related fields across over 80 different countries worldwide.

If your company is looking to develop new business opportunities overseas, IAESTE is a great way to build contacts and cultural links. We offer UK employers well qualified and highly motivated international trainees and, in exchange, we are able to provide science, engineering and architecture undergraduates in the UK with training experience abroad relevant to their studies.

Students are hand-picked through a stringent selection process according to your criteria. IAESTE UK takes care of visas, work permits and accommodation, leaving the supervisor free to get the most from having the student with them. The service that we provide, in sourcing the student and taking care of the administration, is completely free. The only cost to the company is the student's salary, which must adhere to at least minimum wage.
